

Samuel Beckett: Photographs

Collected here is a series of photographs by the Irish photographer John Minihan that presents a view of Samuel Beckett that has long been missing. The most remarkable thing about this collection of photographs of Beckett is that it exists at all, for Beckett was notoriously elusive throughout his life. When he was awarded the Nobel Prize for Literature, journalists were unable to locate him for interviews and photographs; he did not even go to Stockholm to accept the prize. Minihan's photographs take a rare and intimate look into the life of this intensely private man. Black-and-white photographs throughout
